

THE DELMAR SMITH WONDER LEAD

**YOU'LL WONDER HOW YOU LIVED
WITHOUT IT !**

**Always start with your WONDER LEAD around the dog's head,
directly behind the ears.**

**For dogs that jump and pull on the WONDER LEAD, place the
loop under the ear next to you and over the opposite ear. Give
tension and release, repeat until the dog quits without a
command.**

**After your dog responds to the tension alone, combine the
command with tension, then release.**

NEVER KEEP CONSTANT TENSION ON YOUR WONDER LEAD.

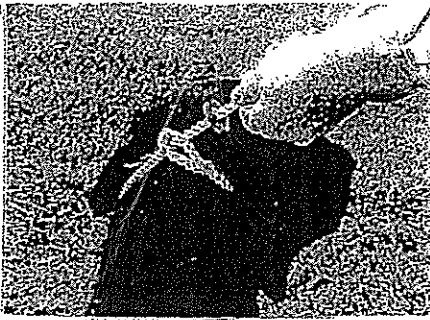

**With the use of these simple instructions you can encourage
boldness in a shy dog, or decrease boldness in a bold dog.**

**Great for Pointing Breeds, Retrievers, Show, Obedience or
Family Dog.**

THE DELMAR SMITH WONDER LEAD

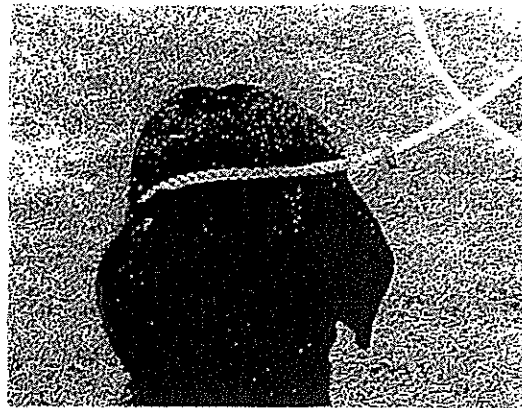

Put the WONDER LEAD over the dogs head position loop in center of the head. Slide keeper 1 to 2 inches from loop. This will keep the WONDER LEAD in position.

2. To get more control if needed put WONDER LEAD in front of one ear and behind the other ear. A light pull and release is all that is ever needed.

3. When using the WONDER LEAD to teach the command "HEEL" if your dog tends to push into your leg place the WONDER LEAD in front of the ear closest to your leg (left handed people dog on right, right handed on left) behind ear away from your leg with tension across top as in photo. Pull and release while giving command.

4. If your dog wants to jump and pull hard when starting put WONDER LEAD in front both ears. Pull and release until the behavior is under control then change WONDER LEAD to just one ear. Pay close attention to tension on your WONDER LEAD.

5. Light pull and release is all that is ever needed with WONDER LEAD.

NEVER KEEP THE TENSION TIGHT.
